Remember: This is an interview, not a test

Item number circled are to be asked at follow-up.

Items with an asterisk are cumulative and should be rephrased at follow-up.*

CONFIDENCE RATINGS questions are for the interviewer. Do not ask these questions to the client.

INTRODUCING THE ASI: Seven potential problem areas: Medical, Employment/Support Status, Alcohol, Drug, Legal, Family/Social, and Psychological. All clients receive this same standard interview. All information gathered is confidential.

There are two time periods we will discuss:

1. The past 30 days
2. Lifetime Data

Patient Rating Scale: Patient input is important. For each area, I will ask you to use this scale to let me know how bothered you have been by any problems in each section. I will also ask you how important treatment is for you for the area being discussed.

The scale is:

- 0 - Not at all
- 1 - Slightly
- 2 - Moderately
- 3 - Considerably
- 4 - Extremely

If you are uncomfortable giving an answer, then don't answer.

Please do not give an inaccurate information!

INTERVIEWER INSTRUCTIONS:

1. Leave no blanks.
2. Make plenty of comments (if another person reads this ASI, they should have a relatively complete picture of the client's perceptions of his/her problems).
3. X = Question not answered
N = Question not applicable
4. Terminate interview if client misrepresents two or more sections.
5. When noting comments, please write the question number.
6. Tutorial/clarification notes are preceded with a "•"

HALF TIME RULE: If a question asks the number of months, round up periods of 14 days or more to 1 month.
Round up 6 months or more to 1 year.

CONFIDENCE RATINGS:

- ➡ Last two items in each section.
- ➡ Do not over interpret.
- ➡ Denial does not warrant misrepresentation.
- ➡ Misrepresentation = overt contradiction in information.

Probe and make plenty of comments!

ALCOHOL/DRUG USE INSTRUCTIONS:

The following questions look at two time periods: The past 30 days and lifetime. Lifetime refers to the time prior to the last 30 days. However, if the client has been incarcerated for more than 1 year, you would only gather lifetime information, unless the client admits to significant alcohol/drug use during incarceration. This guideline only applied to the Alcohol/Drug Section.

- * 30 day questions only require the number of days used.
- * Lifetime use is asked to determine extended periods of use.
- * Regular use = 3+ times per week, binges, or problematic irregular use in which normal activities are compromised.
- * Alcohol to intoxication does not necessarily mean "drunk", use the words felt the effects, "got a buzz", "high", etc. instead of intoxication. As a rule of thumb, 5+ drinks in one setting, or within a brief period of time defines "intoxication".
- * How to ask these questions:
- * How many days in the past 30 have you used.....?
- * How many years in your life have you regularly used?

Form 24 is a log form used to separately record and track each AE that occurs during the study. If the severity of any pre-existing condition recorded on the Medical History Form (Form 02) worsens, record it as an AE on Form 24 and continue to track it throughout the study. Assess AEs at every study visit, starting on the day the subject signs the Informed Consent through week 13, and again at follow-up. Complete one log for each AE reported. Assess and record adverse events at every study visit by asking the subject a non-leading question such as, "How have you been feeling since I saw you last?" For every AE reported by the subject, begin a separate Form 24.

Assess all AEs at subsequent visits and make updated entries to each log, including updates to severity, relatedness, outcome, etc. If AE continues over several weeks with no resolution, indicate that the AE is continuing and start a new page (Form 24) in the log. Carry the unique AE number to the new page and continue to record subsequent assessments of that particular AE on the new page.

For all items, I - VII, use the response codes located at the bottom of this page. These codes are also located in the Adverse Events Section of the Patient Binder.

Specific Instructions

- AE Number - assign all AEs reported by the subject a unique AE number. This number should be sequential and care should be taken not to repeat numbers.
- Nature of Illness, Event or Abnormal Lab Value - PRINT a brief description of the AE as told to you verbatim by the subject. Keep this description consistent across pages when multiple pages are used for one AE. *For example, if a subject reports a chronic headache that does not abate over subsequent assessments, subsequent pages/references to the same AE should read 'headache' versus another description such as 'migraine.'*
- Date of Onset - Record the date that the AE began, NOT the date that it is being recorded.
- Date AE First Reported - Record the date of the visit when the AE is first reported by the subject.
- Date AE Reassessed - Enter dates of subsequent visits when AE is reassessed.
- Type of Report - If the AE occurs prior to the first dose of study drug, indicate that the AE is a screening/baseline AE by selecting (1). If the AE occurs after the first dose of study drug is given, the AE is to be considered treatment emergent. Indicate whether the AE is Anticipated, (2), Unanticipated, (3), or due to an Intercurrent Illness (4).
- Relation to Study Agent - Indicate the assessment of the AE's relationship to the study drug, in the opinion of the investigator. If attribution of the AE's relation to the study agent changes over time, record the new code in subsequent entries.
- Highest Level of Severity - Indicate the highest level of severity reported for this AE. For subsequent entries, indicate the highest level of severity since the last assessment.
- Reported as SAE - Indicate if this AE was recorded as an SAE by marking (x) the appropriate box.
- Action Taken - Indicate the action that was taken in response to the AE. If no action was taken, enter (6), Not Applicable.
- Outcome - Indicate the outcome of this Adverse Event. If the AE continues over time, the outcome may change. Record changes in outcome in subsequent entries.
- Date of Resolution - Record a date only if the AE is resolved. If resolved, Indicate the date that the AE resolved NOT the date of the visit when the subject reported it was resolved.
- Continuing - If the AE has a Date of Resolution, indicate that the AE is not continuing by marking (x) the response box to indicate 'No'. If the AE has not resolved, indicate that it is continuing by marking (x) 'Yes' and begin a new page for that particular AE. Be sure to carry the unique number to the new page.

Form 24-AE Log

Study staff, assess adverse events at each study visit, beginning on the day the subject signs the Informed Consent. Give each AE a unique AE #. Keep one log for each AE and complete subsequent pages as needed. Submit this form to the CSPCC once the page is complete, or once the AE resolves. If AE is continuing, carry AE # to a new page and continue to update at each study visit.

If medications from Form 06 continue after the first dose of study drug, make a new entry on this form to show them as concomitant meds. Complete this log at every visit from the 2nd visit of study week 1 - Week 13 and at follow-up visit (week 17).

Assess any concomitant medications taken since the last entry. Enter all prescription and over-the-counter drugs taken therapeutically during the study including herbal preparations. Make a new entry when a dosage and/or frequency change occurs. Use additional pages as necessary. Number completed pages and forward to the VA CSPCC after the subject has discontinued from the study.

* If medication taken as a result of an **Adverse Event**, list number(s) of event(s) from Form 24. If NOT, please be sure to list indication.
