## **CTN-0083 Data De-Identification Notes**

---

The de-identified data set for this study was prepared and submitted to Data Share by the study investigator team. In compliance with CTN study requirements, the site-identifying variables listed below were omitted from the published data set.

- Race Identifiers: All specific race identifiers were eliminated.
- Dates: All dates except date of birth were converted to “days on study”, where the start date = day 0. A negative value for days on study refers to an event that occurred prior to the start date and a positive value for days on study refers to an event that occurred after the start date.
- For specific column names, refer to the “CTN0083-Nullled-Values” spreadsheet file.

See the “CTN0083-Data-Dictionary” Excel workbook file for descriptions of the data.
